

Jasmine Valencia

(775) 342-3494 | jasmariavalencia@gmail.com | Reno, NV

EDUCATION

University of Nevada, Reno

Reno, NV | Expected May 2027

Bachelor of Science in Electrical Engineering

- Emphasis in RAVES (Robotics, Autonomous/Aerial Vehicles, and Embedded Systems)
- Minor in Mathematics
- Dean's List, GPA: 3.911

WORK EXPERIENCE

K-12 Outreach Student Worker | UNR College of Engineering

Oct 2023 – Present

- Facilitate interactive workshops to introduce K-12 students to the engineering design process and foster critical thinking skills
- Develop and implement engaging, hands on STEM activities
- Recruit prospective students to UNR and encourage higher education in engineering

Summer Camp Leader | UNR College of Engineering

June – Aug 2024, June – Aug 2025

- Organized and led various challenges to sharpen problem solving skills and familiarize campers with the different engineering disciplines
- Managed group dynamics by providing guidance, conflict resolution, and support
- Assisted UNR faculty while campers explored and conducted experiments in research laboratories

PROJECTS

Astable Timer & LED Sequencer

- Designed and assembled a surface-mount LED sequencing circuit using a 555 timer-based LED sequencer and CD4017 decade counter
- Implemented a BJT switching stage to drive multiple LEDs without overloading ICs
- Validated circuit timing accuracy within 3% of theoretical prediction

Evaporation Cooling System

- Built an evaporation cooling system utilizing a water level detection sensor, temperature and humidity module, and fan blade motor
- Programmed the Arduino Mega 2560 to process the water's current temperature and humidity, display the data on an LCD screen, and activate the fan when the temperature exceeded a certain threshold
- Operated in a team environment and met regularly to discuss project goals and deadlines

SKILLS

Coding Programs: Python, MATLAB, C/C++, Java

Software: Office 365, Google Workspace, MathWorks, NI Multisim, LabVIEW

Practical Skills: Soldering, Circuit Design, Microcontroller Programming, Data Visualization

RELEVANT COURSEWORK

- Power System Fundamentals
- Control Systems I
- Circuits I /II
- Electronics I
- Signals and Systems
- Embedded Systems Design

ORGANIZATIONS/LEADERSHIP

Theta Tau | Rho Delta Chapter | Professional Co-Ed Engineering Fraternity

- Regent – Oversee chapter operations by directing meetings and managing the executive board
- Scribe – Recorded and organized meeting minutes and other important chapter documents

IEEE | Institute of Electrical and Electronics Engineers

SWE | Society of Women Engineers
